Summary

Motivated and detail-oriented aspiring web developer with a strong foundation in HTML, CSS, JavaScript, and responsive design. Eager to apply academic knowledge and hands-on project experience to contribute to a dynamic team. Passionate about creating user-friendly, visually appealing websites and continuously learning new technologies. Seeking an internship opportunity to gain real-world experience, enhance technical skills, and deliver impactful web solutions.

Skills

Programming Languages: JavaScript, MERN stack.

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap 5.

Backend Development: Node.js, Express.js, RESTful APIs.

Database Management: MongoDB, MySQL.

Tools Technologies: Git, GitHub, VS Code, NPM, Render.

Projects

Full Stack Video Conferencing Web App| [GitHub] | [Demo]

- Developed a real-time video conferencing web app application using WebRTC technology.
- Implemented features such as seamless video/audio calls, screen sharing, chat functionality, and user authentication.
- Used Node.js for server-side logic and WebSocket for real-time communication.
- Integrated MongoDB for efficient user data storage and management.
- Deployed the application on Render, ensuring reliability and scalability.

Journey - Full-Stack Travel Website| [GitHub]

- User Authentication: Implemented secure user signup and login functionality.
- Destination Management: Enabled users to add and manage their own destination information, including descriptions, images, and reviews.
- Image Uploads: Integrated Cloudinary for image storage and optimized image handling.
- Implemented a feature to allow users to choose images from their local folders.
- Deployed the application on Render, ensuring reliability and scalability.
